Electronics and Communication Engineering
Master of Technology, Embedded Systems and IoT
School of Engineering and Sciences
SRM University AP

I am pleased to submit my project report documenting the work I completed during my summer internship in the Electrical Engineering Department at IIT Palakkad. Under your guidance of **Dr. Naga Brahmendra Yadav Gorla Ph.D, Assistant Professor**, I had the opportunity to participate in the research project "**Power Electronic Circuits - Numerical Simulations.**"

This internship provided me with valuable hands-on experience in numerical simulations of power electronic circuits. I gained proficiency in using circuit simulation software to model and analyze the behavior of various power electronic topologies. Through this project, I developed a deeper understanding of the design considerations and trade-offs involved in power converter circuits.

In the attached report, I have documented the objectives, methodology, and key findings of my internship work. The report includes detailed circuit simulations, performance analyses, and design optimizations for several power electronic circuits. I believe the insights gained from this project will be beneficial for future research and development in this field.

I would like to express my sincere gratitude for your mentorship and support throughout this internship. Your expertise and guidance were instrumental in the successful completion of this project. I am grateful for the opportunity to have worked with you and the Electrical Engineering team at IIT Palakkad.

Please find the project report attached for your review. I am available to discuss the report or any aspects of my internship experience in more detail.

Thank you for considering my work.

Best Regards,
